Here is a copy of the journal references I used in my research on the Crandall Canyon Mine effluent. I have included PDF's of the public documents and a list with the citations for the copyrighted documents. Most of the research on mine effluent is focused on remediating acid rock drainage with a little bit of the research focused on neutral waters, so the information pertinent to Crandall Canyon is nestled throughout the documents I have sent.

If you have any questions, please don't hesitate to contact me,
